

Practice Education Guidelines for BC Evaluation of Placement Experiences GL#2-8

Practice Guideline

March 22, 2007

Receiving Agencies and Placing Agencies should solicit feedback regularly from students, faculty and staff regarding the quality of practice education experiences.

Guideline Details

Students, faculty and Receiving Agency staff should be given an opportunity to provide feedback on the learning experience and identify opportunities for improvement.

Feedback should be reviewed and utilized for quality improvement purposes.

See Appendix A for sample evaluation questions.

Roles and Responsibilities

Both Placing and Receiving Agencies:

- Ensure each practice education setting provides adequate and appropriate learning experiences and resources to meet desired learning outcomes.

Receiving Agency:

- Create a positive learning environment and welcoming students.
- Educate and develop staff as student supervisors/preceptors, either solely or jointly with Placing Agencies.
- Develop a process for soliciting, reviewing and utilizing feedback.

Rationale

The monitoring and review of the practice education setting is part of Receiving Agency quality assurance and national accreditation standards. Evaluation provides guidance for improving the learning environment.
